

CHEMTROL® PC2100 Programmable Controller

Designed for pool and spa applications

The CHEMTROL® PC2100 controller is a fully programmable controller that offers automatic control of water chemistry. Advanced microprocessor-based technology that introduces a new standard of sophistication in automated water treatment.

Designed to control pH, ORP and ppm, Free or Total chlorine sensor with direct reading in ppm or mg/l, plus heating control, water saturation, water balance, as well as display of the Langelier Saturation Index (LSI). The user-friendly main screen display enables the operator to supervise all the process functions at a glance and to quickly respond to any changing condition.

Automated water treatment since 1976

- QUALITY**
Proven reliability and performance with 5 year electronics warranty
- TECHNOLOGY**
Remote monitoring and control with true duplex operation
- EXPERIENCE**
40+ years of research and development behind our product range
- SUSTAINABILITY**
Chemical & Energy saving programs designed to reduce operating cost
- PEACE OF MIND**
Consistent disinfection under varying conditions and regulations

Key Features

- ✓ pH control with a choice of acid or base feed
- ✓ ORP Monitoring with Oxidizer Control
- ✓ Free or Total chlorine control (ppm)
- ✓ Chlorine sensor with direct reading in ppm or mg/l
- ✓ Heating control | Remote alarm
- ✓ Langelier saturation index (LSI)
- ✓ On-board data logging with adjustable intervals
- ✓ Choice of 1, 2 or 3 point calibration
- ✓ OPTION: TDS control with temperature monitoring

Hassle free installation

We want to make the installation of CHEMTROL® controllers as simple as possible. This is why we have everything mounted onto a customised manifold ready for connection.

- CHEMTROL Flow Cell Assembly (FCA)
- Blade style safety flow switch
- 12 mm glass pH/ORP probe holder
- Designated clear flow cell for ppm sensor
- Flow adjustment valves & flow indicator
- Water sampling valve | Optional TDS/TEMP fitting
- Slotted cable ducting for clean and neat installation

Remote monitoring with CHEMTROL® mobile app

We know that you need to control and monitor your facility 24/7, which is why our range of programmable controllers all have remote access capability. With the remote operation function any number of facilities can be controlled and monitored from your computer or via mobile app.

Smart web-server technology offers true duplex operation with identical screens on both the controller and your PC or any mobile device.

This is particularly useful for remote monitoring, operator training and troubleshooting, as well as real-time control of all operating functions including status reports, trend graphs and automatic alerts by email or text messages.

The CHEMTROL® advantage

✓ Our waterproof cabinet have all your communication requirements in one box

- Remote monitoring and control with our cloud base web-server via Ethernet port or WIFI interface
- True duplex operation technology that mirrors the controller display on your PC/ or any mobile device
- Wireless control using a router
- 4-20mA signal for monitoring display outputs
- Building Management System (BMS) Communications

- ✓ Modbus IP
- ✓ Modbus RTU
- ✓ BACnet IP
- ✓ BACnet MSTP
- ✓ and LonWorks
